The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 33-38 are rejected under 35 U.S.C. 102(b) as being anticipated by French 2221829.

French discloses (Fig. 4) first and second contact legs in a mirror image relationship, each leg having a first mating portion comprising an outwardly angled shoulder region 17 and a hinge 18, and a second mating portion 19. Also disclosed is insulative housing 21. Note that the circuit structure through hole is not being positively recited.

Claims 1, 2, 4-11, 16, 17 and 19-32 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: as pointed out by applicant, French '829 does not disclose or teach first and second discrete engaging areas defined by respective bends in combination with the rest of the subject matter of claim 11, nor would it have been obvious to modify French in this way in view of the other prior art of record.
